**Fellatio tongue techniques for women.**

Similar to cunnilingus, licking, sucking, tipping, and nibbling are the basic principles.

## Different positions for fellatio

### (Standard fellatio)

Each partner is relatively comfortable, and the man can see the woman's face.

### (Standing fellatio)

Pleasure can be increased with the man using his hips.

THEY ALSO REALLY LIKE IT WHEN YOU TRY DIFFERENT POSITIONS...

### (Fellatio from the side)

A similarly-pleasing position for the man, though it can be more difficult for the woman.

### (Fellatio in the woman-on-top-position)

Licking the verge of the glans provides strong stimulation.

### (Fellatio in the man-on-top-position)

The man using his hips while the glans is licked can double the pleasure!

### (Fellatio on the side)

Each partner is free to please the other.

### (Fellatio from below)

Sadly, it's not possible to look the woman in the eyes this way.

※ The man can let the woman take the lead and try various positions, but should never force her to do anything against her will!
